Coulton.

1653.

**PROGNOSTICATION,**  
wherein is succinctly handled  
all the most notable mutuell  
Aspects and configurations  
happning this year,

**As Also,**  
The Eclipses of the two great  
Lights  
The Earths ingress into the foure  
Cardinall Signes.  
**WITH**  
Many other Observations very  
delectable.

By **JOHN COULTON** Student in the  
Mathematicks.

*De celo dimicant eff contra eos: stelle  
manentes in ordine et cursu, adver-  
sus Sefarā pugnaverunt. Jud. 5. 20.*

**LONDON,**

Printed by **T. FAWCET**, for the Com-  
pany of Stationers, 1653.

# Astronomical Calculations for this present years.

The true Magnitude of the Tropicall years is 365  
Days, 5 hours, 48 minutes, 0 seconds.

The Syderiall or Starrie years, contained 365 days,  
6 hours, 9 minutes, 39 seconds.

The Precession of the Equinoctiall is 50 degrees, 10  
minutes, and 17 seconds.

The Obliquitie of the Zodiack, is 23 degrees, 31 min.  
and 30 seconds.

## Locum Apogei Planetarum ad Meridiana Calend. Januarij 1653. Anni, 1653.

	Grad.	Min.	Second.	
☿	27	9	36	♈
♈	8	46	35	♈

♌	14	18	45	♌
♍	9	9	16	♍

Here I desire the courteous Reader to correct his  
faults as they accidentally escape my Pen, for (humanum  
est errare,) it is a great fault in humane nature to  
erre: Which thing I shall accept as a great kindness  
from him, and so I rest,

From Cobham in Surrey,

April 16. 1653.

Yours in friendship,

JOHN COYLTON

Coulton, 1643.

**Prognostication for the year of  
our Lord, 1653**  
**January.**

*From all Physick and Phlebotomy refraine,  
Except some great necessity constrain:  
Use such Dyer, which is both hot and dry,  
Not with excesss, but with Sobriety.*

The second Day  $\Delta$   $\text{H}$  2 to 4, like to bee Snow or  
cold raine.

The 3. day the Moone is at full, at 5 a clock and 13  
after-noon.

The 4 day  $\odot$   $\text{V}$   $\text{Y}$   $\text{R}$   $\text{Q}$   $\text{P}$ , on the 5 day, *Ad  
illud vel pluvium inclinabitur*, This Quarter is li-  
able to clouds or raine.

The 11 day the Moone is in her last quarter at 7 a  
clock in the after-noon. 16. day,  $\square$   $\text{H}$  3 1 p. This  
Quarter is like to prove (in generall) temperate, but  
somewhat windie.

The 18 day the Moone is new about 4 a clock and 8.  
in the morning. 20 day,  $\square$   $\odot$   $\text{H}$  4 1 p.  $\square$   $\text{V}$  12 p.

The 22 day  $\odot$   $\text{V}$   $\text{Y}$   $\text{R}$   $\text{Q}$   $\text{P}$ , *Torriditas humilitas*, this Quarter  
generall productiv wind bringing snow and raine.

The 27 day the Moone is in her last quarter, 10 mi-  
nutes at 11 a clock after-noon. *Nunc equa compassio  
gila, nemine claudis thym*, this Quarter is generall

## A Prognostication.

Is like to be faire and frosty, with fresh gales of wind  
now and then.

**T**his Month, for all kind of Fruittrees, and  
Quick-sees (in the new of the Moone, the  
wind and weather considered.) You may  
take off superfluous branches from Fruit-trees:  
And now may you prepare your ground for  
Gardens, and cut your Vines in some of the  
Twelve dayes; Likewise set Pease, and Beans,  
sow Parsneps and Oates, the weather being  
milde, and the Moone decreasing; also remove  
the rootes of your Trees.

### February.

*As yet beware, how that you Physick take  
Without counsell, or for to Bleed doe speake:  
Likewise take heed, lest that you doe catch cold  
For thereby soon, an Ague will lay hold.*

The first day, there is a ☾ ☿ ♀ 77. the former first  
renewed, and raise ethert.

The second day the Moone is full about 10 a Clock in  
the morning. Third day ☿ ♀ ♄. 3 P m. the  
quarter for the most part indifferent good weather, but  
often stormes of wind driving the clouds and the sun.

The 10 day, the Moone is in the full quarter and  
3 a clock after noon.

On the 11 day ☿ ♀ ♄. 1 P m. 12 day ☿ ♀ ♄. 2 P m.  
The 12 day, the Moone is in the full quarter in generall is  
fine, but a very troubled and uncomfortable Aire.

# Coulton. 1653.

The 17 day, the Moone is new, and the Sun Eclipsed  
not visible in England, 11 minutes past 5 a clock  
in noon. The same day  $\odot$   $\text{h}$   $\odot$   $\text{p}$ . *Admittum frig-*  
*oris, pluuia streps & obscura aura*, this quarter like  
is troubled with raine, snow, or darke weather.  
The 25 day, the Moone is in first quarter at 47 min.  
past 2 a clock in the after-noon. 26 day  $\odot$   $\text{h}$   $\text{M}$  10 p.  
the quarter is various, with stormes of wind bringing  
snow or hail.

This Moneth is a very fit time to set Roses  
with all other kind of Plants, but Quick-  
sow Pease and Onions, as before in Ja-  
nuary (the weather considered) you may now  
go to Garden for Sallet-herbes, Pot-herbes,  
as usual like; and now cover up the rootes of  
the Trees with good earth which you opened  
before in January.

## March.

To Bleed or Bath, a person may apply  
himselfe thereto, and purchase health thereby:  
And if to Purge himselfe bee his intent,  
he may doe it safely, and not repent.

The first day  $\square$   $\odot$   $\text{p}$  1 p. the weather is yet not much  
different.

The 3 day the Moone is full 2 minutes past 4 a clock  
in the morning.  $\square$   $\odot$   $\text{p}$  2 p. on the 8 day, and on the  
10 day  $\Delta$   $\odot$   $\text{p}$  6 a. this quarter for the most part is like  
the very unconstant weather.

At this full Moone there will be a great Eclipse of the  
Moone

# A Prognostication.

Moon to be seen in England, and the adjacent Countries in the Occidentall or Western quarter of the Heavens: But it will appeare in their Meridian or Noon-Head, who inhabite the Longitude of 326 Degrees, viz. *Brasil*, or neere the land of *Laurado*, &c. the Moon at that time appearing to sight with a very black colour.

<div> <div> <div></div> <div></div> </div> <div> <div></div> <div></div> </div> </div>	Beginning of this Eclipse will be	1. 50	<div> <div></div> <div></div> </div>
	Beginning of totall darknesse,	3. 18	
	Middle or greatest obscuration,	3. 44	
	End of totall darknesse,	5. 16	
	Full and compleat end,	6. 00	

(Eclipsed — 18. 03 min.

The totall duration of this Eclipse will bee a houre, and 10 minutes. *Non solum Proleste, Quod dicitur de Eclipsi* *Isidorus, in chronico dicitur quod esset in anno 1654. Quot horis durat Luna et Mercurius.* Therefore the effects of this Eclipse begin to worke on the 10. th day of December or thereabouts; but the height of Influence is about the 12. th of February next, 1654. — In this Eclipse *Mars* hath greatest power, *Mercury* next, *Jupiter* next: *Mars* is posited in the 10. th House, and in scaple his owne house and triplicite; and hath also a Planeticke ☐ to *Mercury* in the Ascendent, being in his debilitie and fall, and also Peregrius: also the Moon is then in the 02. degree of *Pisces*. All which (being well weighed in the ballance of Astronomie) declareth that this Eclipse doth generally threaten Warres, and much with great heat, tempestuous and violent Winds, Thunder and Lightning, great drought, and also scarcity of Graine and the fruits of the Earth: (*Morgellius super affert, sicut Proclus*) It likewise portends many sore and grievous Diseases, Robberies, Piracies, Slaughters and Depopulations, *Cum multis aliis, &c.* But this print-

all concerns chole under *Virgo*, *Pisces*, *Gemini*, and  
*Aquary*, *Cant* *Cardinalis*. This Signe is humane, and  
therefore the influence of this Eclipse will operate chief-  
ly upon Man-kind. Though Cities were wall'd with  
bricks even round about, — yet Heaven his vengeance  
will shew, and him out; For though they bee secured  
from foreign Enemies; — Yet sinne amongst them-  
selves shall befall to arise; and so much touching this  
Eclipse, and his effects.

On the 9<sup>th</sup> day of this Month, the Earth enters  
at 14 hours 1 minute after-noon, (in *Metricians*  
*Ballford*, id est) on the 10<sup>th</sup> day at 1 a clock and one  
minute in the morning: the apparent place of the Sun  
being then at *Gaillard*, in 6 degree, 0 minute of *Aries*:  
in which moment the 27 degree 30 minutes of *Sagittary*  
succeding our Horizon, *Saturne* being neare the  
signe of the 8<sup>th</sup> house, *Jupiter* the 2, *Mars* the 12<sup>th</sup>,  
*Venus* the 11<sup>th</sup>, *Sun* and *St.* in the second house, the  
Moon in the 12<sup>th</sup>, &c. *Apollon* in the 10<sup>th</sup>, &c.

This quarter naturally is Hot and moyst, and there-  
fore resembled to Blood and Youth, as being most tem-  
perate and healthfull time of all the yeare; For now the  
Sun (joynd with *Saturne* of a hotter nature) beginneth  
to consume and consume the reliques of *Winters* superflu-  
ity, whereby the Earth is exultated to generation;  
whereby all things begin by little and little to spring and  
grow.

*Apollo* now, in his chiefe Dignitie,

bringeth forth young Plants, which hid before did lie:

This doth rejoyce, faire Flora, hearts all houres,

so see faire Gardens all be spread with Flowers.

The 11 day, the Moone is in her last quarter at 11  
a clock in the morning. The 16 day  $\Delta$   $\odot$  7 a.

## A Prognostication.

*Weather also depends on the quarter in general is like to be temperate and faire.*

The 19 day, the Moone is new at 34 minutes past 6 a clock in the morning. The 21 day \* ☾ ☉ 46. 23 day

Δ 8 5 6 4. 24 day Δ 1 5 1 4. this quarter in general bringeth overcasting clouds with a balling wind.

The 27 day the Moone is in first quarter, 43 minutes past 7 a clock in the after-noon. The 29 day \* ☾ ☉

3 4. 31 day ☉ ☽ 1 2. this quarter is like to produce often stormes of raine or hail, with sudden gusts of wind.

**I**N this Moone you may Graft, set Quick-setts and Vines, cut your Hedges, and Vines already growing; but all this is best to doe in the new of the Moone, or first quarter. Also you may sow Onions, Beanes, and Oates, and all manner of Garden-seeds, the weather being milde and temperate.

## April.

*New Nature's strength begins for to renew.*

*The Earth is turn'd into another face.*

*Expells all Humours which in thee do breed.*

*So may thy body, from Sicknesse still be freed.*

The second day, the Moone is full 17 minutes past 9 a clock in the after-noon. The 3. day Δ 8 9 1 1

7 day Δ 1 2 6 4. ☐ 1 1 1 1. through this quarter is like to be fine and pleasant showers.

The 10 day the Moone is in her last quarter 36 minutes past 6 a clock in the after-noon. The 11 day ☐ 1 2 1 1

quarter in generall, is like to bee violent stormes  
and bringing halke showers, if not thunder-claps.  
The 17 day the Moone is new 46 minutes past 10 a  
clock in the morning, this quarter is like to bring some  
halke showers.

The 18 day, the Moone in first quarter 51 min. past 2  
clock in the morning. The 19 day \* h 2 p. and  
10 10 10. *Indies secundissim cum flatuum sibilis.*  
this quarter promisseth pleasant and fruitfull showres,  
and fine springing thye.

**N**ow Role your Hops, sow Barley and Ar-  
nichokes, batke Trees for Tanners, sow  
Lump and Flax, set Citrons, viz. Pompions,  
Melons, and Cucumbers; and also furnish and  
enrich your Gardens with Summer-herbes.

### May.

*Great Suppers doth the stomach much offend,  
lay light if quiet you to sleepe intend:  
long sleepe at After-noones, by Birring fumes  
breeds Sletch and Agnes, taking beards and rheumes*

The second day the Moone is full about 16 minutes  
past one a clock after-noon. The same day ☐ h 2 p.  
1 day ☐ 3 6 a. *Indies repensio*, this quarter there  
is like to be many violent stormes of wind with sudden  
tempests.

The 10 day, the Moone is in her last quarter at 12  
minutes past 3 a clock in the morning. The same day  
☐ y 2 12 a. 13 day ☐ 3 2 3 a. this quarter in gene-  
all is very faire and wholesome weather.

The 16 day the Moone is new, 33 minutes past 6 a  
clock

## A Prognostication.

clock in the after noon. 15 day \*  $\text{h} \odot \text{i} \text{p}$ . 16 day  
 $\odot \text{v}$  17. Calumpurgation, vntill the 21. the weather  
 be the most part faire, with gentle breathing gales  
 of fresh winds.

The 23 day the Moone is in the first quarter 4 min.  
 after midnigh. 26 day \*  $\text{h} \odot \text{v}$  27 day  $\odot \text{v}$   
 28 day  $\Delta \text{v} \odot \text{v}$ . 29 day \*  $\text{h} \odot \text{v}$ . The weather  
 gives a cold and cloudy aire with much variable  
 weather.

**I**N the beginning of this Moneth you may see  
 the Seeds of such heales as would not abide  
 the cold of the fore-past Moneths: you may  
 yet sow hemp and Flax; weed your Hap-  
 gardens, and take away superfluous branches and  
 Mould from your grafters.

### June.

*This Month be choyse of Food in any wise,  
 Also abstaine from vniuersall Excesses  
 But now its best to Bath in water coole,  
 Either in a River, a Pond or Riuerside*

The first day the Moone is full, 58 minutes past 12  
 clock in the morning. 4 day  $\Delta \text{h} \odot \text{v}$  this quarter  
 promitteth a faire and warme season.

The 21. day the Moone is in her first quarter, 10  
 minutes past 9 a clock in the morning. 22 day  $\odot \text{v}$   
 23 day  $\odot \text{v}$ . In the 24. day the weather  
 looks for calme Thunder stormes.

On the 28. day of this moneth, beginneth the  
 summer quarter when the Earth enters  $\text{v}$ , which will be

minutes past 5 a clock in the morning: the Sunne  
appearing in the entrance of Cancer. The proper  
nature of this quarter is hot and drie, and therefore  
ruled to the Fire, and Choler, bringing all Fruits  
to their ripenesse.

The 14 day the Moone is new 14 minutes past two a  
clock in the morning, and now Mercury is in greatest  
distance from Sol. 19 day  $\Delta \vee \Pi + 4$ , this quarter is  
calm and unconstant weather.

The 22 day the Moone is in the first quarter at 5 a  
clock after-noon. 27 day  $\odot \oplus \ominus 14$ , 29 day  $\Delta \delta \ominus$   
at midnight, *Calor immensus & mirrae ignis fulguribus*,  
this quarter will be very hot for the most part with a  
drying wind.

The 30 day the Moone is full 30 minutes past two a  
clock after-noon.

**N**OW it is a very convenient time at the full  
Moone to gather those Herbes which you  
meane to keepe for the whole yeare, but be sure  
you dry them in the shade; weed your Corne-  
fields and Gardens, set Rosemary and July-  
flowers; sow Lettice, sheare Sheepe, the Moone  
increasing; and now rid your Garden of Snails,  
Lar, or Pismires.

### July.

*Put Tarre upon a chafing dish with coles,  
herewith perfume your Chambers all the holes:  
Thus do each morn and use herbes moyst and cold  
If you intend in health your selfe to hold.*

The

## A Prognostication.

The first day of July  $\Delta \odot \delta$  12. The 7 day the Moone is in the last quarter, 33 min. past two a clock after noone. The 9 day  $\Delta \odot \delta$  27. The 10 day  $\delta \odot \delta$  8 p. 14 day  $\delta \odot \delta$  3. This quarter like to be hot weather, mixt now and then with thunder-clay.

The 14 day the Moone is new 43 min. past noone. The 19 day  $\delta \odot \delta$  4, and of  $\delta \odot \delta$  7 p. 20 day  $\delta \odot \delta$  10 p. this quarter is very hot till toward the latter end, then windy with dark and obscure clouds, yet scarce any rain.

The 21 day the Moone is in first quarter 35 min. past 16 a clock in the morning. The 24 day  $\delta \odot \delta$  11 noone, this quarter like to be a stormie season, but for the most part faire and pleasant weather.

*While Sunne doth shine, 'tis best to make your Hay;  
For when it is past, it will away.*

The 30 day the Moone is full 9 minutes past one a clock in the morning. There is a  $\square \odot \delta$ , third day of August at 7 in the after noone. Tempus inclementis & pluviosus, this quarter threeweekes rains, and other while faire weather.

**I**N this Moneth ply your Haying, pull up Hemp, it is good to fallow your Land for Wheat, and carry our soyle it leysure permit dry Flowers in the shade till they be almost dry, and then Sun them a little for feare of corruption; doe in like manner with your herbes.

### August.

*Of sursetting see that you have a care,  
Because the Dog dayes now great smart do breed.  
In the Day-time, of sleeping much take heed,  
For thereby Agues and Head-aches breed.*

The

The 5 day the Moone is in her last quarter, 34 minutes past 3 a clock in the after-noon. *Nubes cretae & rubeae* particular. This quarter in generall is vary weather.

The 13 day the Moone is new 5 minutes past one a clock in the morning. The 19 day \* V 3 5 4, this quarter for the most part temperate and coole weather. At this new Moone the Sun will be Eclipsed, to be scene of those people who live North-west from us, viz. In North America, and neare the Circle-Arctique, &c.

The 21 day the Moone is in first quarter, 49 minutes past 3 a clock in the morning. The 25 day Δ V 7 3 4, in max. & long. 4 0 0, this quarter is like to prove made with stormes of raine, thunder and lightning.

The 28 day the Moone is full 46 minutes past 10 a clock in the morning. The 29 day □ 0 0 at noone, this quarter fine hot weather.

At this full, the Moone will bee Eclipsed to the quantity of 18 Digits, to be scene of our Antipodes and Persia, also in the East-Indies, China, Mexico, and many other Places as well West as East.

**N**OW reape Wheat and Rye, mow downe your Oates, gather Garden seeds, sow Lettice, and other Winter herbes, in the new of the Moone.

**September.**

Now Physicke then may st safely take againe  
And Bleed or Scarbe & remedy thy paine.  
To eat & re much raw Fruit, is very naught,  
Better be advis'd too soone, then too late.

The

Coulton, 1653.

October.

The Month but meats and drinks are very good  
to preserve thy health and nourish thy blood:  
from man-shedness, see also that thou fly  
so shalt thou, escape much paine thereby.

The third day the Moone is in her last quarter, 18 mi-  
nutes past 11 a clock in the morning. The 7 day  $\Delta$  3 3  
8 day  $\Delta$  4 3 p. 10 day  $\square$  2 1 a. 12 day  
14 day  $\Delta$  5 3 a. this quarter, a very dark  
cloudy ayre.

The 11 day the Moone is new 36 min. past 9 a clock  
in the morning. 13 day  $\Delta$  6 3 p. this quarter a  
small faire and windie.

The 17 day the Moone is in first quarter, 11 minutes  
past 10 a clock in the morning. 21 day  $\square$  2 1 a.  
this quarter is like to prove pretty good, onely the wind  
maye bringe raine now and then.

The 26 day the Moone is full 23 min. past 5 a clock  
in the morning. 29 day  $\square$  4 1 a, this quarter looke  
for great and cold winds with a cloudy and darke ayre.

Remove young Plants and Trees in the new  
of the Moone, and about the full of the  
Moone gather such as you left ungathered the last  
month: sow Wheat and Rye, set Achornes,  
Nuts and Filberds, cut your Rose-trees, but once  
in two years if you intend to have store of  
hoies.

November.

# A Prognostication.

November.

*End now the Physick which you meane to take,  
And then till March doe you the same for safety  
Hot-houses also for that you frequent shal  
But in beddenke, use Rhenish and Cinnamon*

The second day, the Moone is in her last quarter 14 minutes before one a clock in the morning. The 4 day  $\Delta \vee \varnothing$  8 p. 8 day  $\square \odot \odot$  6 a. and  $\square \vee \varnothing$  3 p. 10 day  $\odot \odot \vee$  5 a. *Ad frigiditatem et tempesta pluviosam ob- clays.* This quarter in generall is inclined to a little cold and cloudy aile.

The 10 day the Moone is new, 8 minutes past 11 a clock in the morning. The 17 day  $\odot \vee \odot$  3 p. this quarter for the most part is like to prove faire weather.

The 17 day the Moone is in her quarter 14 minutes past 11 a clock at night. 18 day  $\star \vee \varnothing$  8 p. 19 day  $\star \varnothing \varnothing$  2 p. 24 day  $\star \odot \odot$  11 p. through this quarter looke for misting weather.

The 25 day the Moone is full, 23 minutes past one a clock in the morning. 27 day  $\Delta \vee \varnothing$  at midnight, cleare weather about the beginning of this quarter, afterward it is a very mild season.

**A** Bout the new of the Moone remove young Trees, set Crab-tree stocks to graft on; and in the wane of the Moon, set Pease and Beans, likewise if the weather bee not hard, it is good sowing of Parsneps and Carrots, make Malt, kill Hogs, and make Martinmas Biefe.

December.

Coulton, 1643.

December.

Old weather now begins for to come in;  
Therefore help those whose backs are clothed thin;  
As doe in woods as the Hyppocres doe,  
For you do't shewd. **IN CHRIST bles you.**

The first day the Moone is in the 1<sup>st</sup> quarter 49 min.  
at 3 a clock in the after-noon. 6 day  $\odot$   $\frac{1}{2}$   $\odot$  8 p.  
at 10 p. this quarter begins with frostie weath-  
er, the latter part more tempe.

The 9 day the Moone is new 28 min. past 10 a clock  
at 11 p. 17 day  $\odot$   $\frac{1}{2}$   $\odot$  3 a. this  
quarter is like to bring Frost and snow.

On the 11<sup>th</sup> day the Earth evers  $\odot$  at 2 a clock and  
minutes in the morning, the Sun then appearing in  
the entrance of Capricorn. Now beginneth the Winter  
quarter, all Hearbs and Plants being now quite con-  
fused, and no greene thing appeareth: This quarter is  
compared to Old age, being cold and moist; and there-  
fore apt to breed Diseases as proceed from Flegma.

— Ovid Metamorph. Lib. 2.

*Perque novum stabat cinclum florente corona;  
Stabat nuda Aestas et spicae sorta gerens;  
Stabat et Autumnus colatus cordibus unis,  
Et glacialis Hyems caesus hirsuta capillis.*

The Spring was clothed new, with's garland faire;  
The naked Summer hee th' increase did beare;  
Then sordid Autumn hee the Fruit gathers,  
At last comes frosty Winter with's hoarie haire.

The 17 day the Moone is in first quarter, 21 minutes  
C past

## A Prognostication.

past 10 a clock in the morning, 9 In degrees, *M*  
 s @ s. This quarter forthwith *fart* is like to bee te-  
 perate and milde.

The 10 day the Moone is full 50 min. past 2 a clock  
 in the morning, the same day *Δ* *h* *q* ; 8, this quarter  
 a cold cloudy and snowie time.

The last day, the Moone is in her last quarter  
 minutes past 5 a clock in the after-noon; this quarter  
 is like to bring winds and raine.

**I**N this Moneth sell hard and great Timber (for  
 building) in the old of the Moone: uncover  
 the rootes of your Fruit trees, remove your  
 Trees in the New of the moone, if the weather  
 be not too extreame: Cover those Herbes which  
 cannot indure the cold with Straw from the frost  
 and snow.

---

*(keepe)*  
 January freeze the Pot by the fire, and biddeth Corn  
 February fills the Dike; & that doth good with the snow  
 A bushell of Maye Duff is worth ranimes of Gold,  
 And April Showers are the good to be sold;  
 May with his houglaumes gives Ladies their lust,  
 June sets all things even — Iust;  
 July biddeth all things in order to Ripe;  
 But August biddeth the Reapers take full their gripe.  
 September biddeth gather in your Fruits so fast,  
 October biddeth Hogges come eat up the Mast:  
 Then dirty November, biddeth thrust out your lease,  
 December biddeth Christmasse to spend what you please

How to find the Moons comming to the South, by which you may have the time of Full-Sea in any of these Ports here following.

Days,	0	1	2	3	4	5	6	7
New Full,	13 12	1 1	2 2	3 3	4 4	5 5	6 6	7 7
	00 48	36	24	12	00	48	36	24
Quarier,	6 6	7 7	8 8	9 9	10 10	11 11	12 12	13 13
	00 48	36	24	12	00	48	36	24

First, (when you desire the time of Full Sea at any of these following Ports) you must seeke how many Dayes the Moone is past her New, Full, or Quarters, to which number you are to find on the head of this Table against the title Days; and right under that Number, if you reckon from the New or Full, against the word New, Full, you have the Moones comming to the South: Then you are to add the Houres and minutes annexed to these Ports therunto, and the summe will be the time of High-water at that Place.

Example.

The 6.th day of January this yeare, I desire to know when it will be Full sea at London Bridge. First, I find that the Moone is 3. dayes past the Full, I find the Number 3. against the title Days, and right under that, against the word Full (because I count from the full moone) I find two houres 24 minutes, which telleth mee that

## A Prognostication.

When the *Moon* is South, at two a clock and 24 minutes in the morning: then I seeke *London* in the Catalogue here following, and against that I find 4. Houres annexed, the which I add unto the time of the *Moon*s Southing, and that makes 5 a clock and 24 minutes, the time of High water at *London*. Yet you are to take notice that when the *Moon* is past the Full, she comes South in the Morning; but when the *Moon* is past the New, she comes to the South in the After-noon; therefore because the *Moon* is past the Full, I conclude it high water at *London*, at 5 a clock and 24 minutes in the morning. The like is to be done when you count from the *Quarters*; namely you are to find the *Moon*s Southing against the word *Quarter*. As on the 13 of *January*, the *Moon* is two dayes past the last quarter, and therefore by this Table will bee South at 7 a clock and 36 minutes; and because the *Moon* is yet past the Full, I say shee is South at that time in the morning, &c.

**H**ec that desireth to find the Houre of the Night by the shadow of the *Moon*, on a Sun-Dyall, let him take the houres and minutes of the *Moon*s Southing, to the hour and minute noted with the shadow and the aggregate or summe will bee the Houre of the Night; but if the aggregate exceed 12, subtract 12 houres therefrom, and the remainder is the houre of the Night.

Coulton, 1653.
